

1. Turn off the hearing aid whenever you are not using it by opening the battery door
2. Wipe the hearing aid before you put the hearing aid in the morning and clear it of any wax
3. If the wax filter is misshapen or discoloured or if the batteries are fresh but the sound is low change the wax filters
4. Change the batteries whenever you hear the battery low indicator beeps – change both hearing aids at the same time
5. Put the hearing aid in the dehumidifier every night with the battery door completely open
